

WNM is an audiovisual company located in Liège (Belgium). It specializes in multi camera productions, ENG (electronic news gathering), intercommunication system and HF analog and numerical transmission systems.

WNM mainly focuses on audio recording and owns a large fleet of high tech equipment. It provides technical assistance and consultancy services to organizers of large events such as the Football World Cup or the Olympics Games.

WNM also offers studio engineering services for radio and TV, ranging from technical assistance to the acoustic maintenance of buildings.

Finally, WNM organizes training for audiovisual service providers, television channels and production companies.
