

I-MOVIX is the worldwide leader in extreme slow-motion for sports broadcast (from 75 to over 5,000 fps). The company's products are the first true ultra-slow motion systems, fully integrated for broadcast use, offering the unprecedented combination of very high frame rates and instant replay, or continuous streaming.

The I-MOVIX technology has applications in live sports and other live TV productions, as well as in commercials, documentaries, feature films, industry and scientific R&D.

The company is headquartered in Europe, with a growing global network of distributor partnerships.
