

The Circuit of Spa-Francorchamps is one of the legendary tracks in motorsports and is regularly chosen as the best by drivers from all over the world.

The track is 7 km long with an undulating profile and fast corners, such as the famous and unique Raidillon, and loops through the middle of a forest of fir trees that echo the "vroom-vroom" of engines.

Hosting some of the world's biggest track championships such as: the Belgian F1 Grand Prix, 24 Hours of Spa-Francorchamps, WEC, Benelux Spa World Rallycross and, from next year, the FIM EWC 24H Spa Motos and numerous other events of international renown, the Circuit of Spa-Francorchamps from this point forward will also be in the position to organise some of the races taking place on the track. It is also expanding the track's boundaries through its exhibition dedicated to the Circuit's centenary or with other fun, sporting, or educational activities that will fit perfectly into its verdant environment such as the Circuitsp'Adventure, a green trail through the heart of the Circuit's forest.

Resolutely turned towards the future, it has taken the industry 4.0 cyber corner and is equipped with the latest and most cutting-edge technologies for drivers and their teams and also for the general public.
