

Intelligent document recognition, Digital management of documents, content and processes, Optimization of complex IT infrastructures.

I.R.I.S. Products & Technologies develops and sells technologies worldwide for interlligent document recognition. Professional technologies are sold in OEM (to HP, Samsung, Adobe, etc.) and to IT solution providers. Small office and home office products are sold to shops and throught the net, including through our webshop (www.irislink.com).

I.R.I.S. ECM Solutions & Experts delivers IT projects for digital management of documents, content and processes: digital archiving, digital workflows, etc. This division works directly for large accounts (administrations, banks, industry, services), through offices in six European countries (Belgium, France, Netherlands, Luxembourg, Germany, Norway).

I.R.I.S. ICT infrastructure & Experts delivers servers and digital storage, mainly as an IBM business partner. This division masters the implementation, management, consolidation or environments, networks and the global aspects of digital storage. It has a presence in Belgium and Luxembourg.
